OBJECTIVE

Results-driven Software Engineer with over 2 years of experience in DevOps, seeking to transition into frontend development. Passionate about HTML, CSS, and React.js, eager to apply technical skills and learn new technologies to excel as a frontend developer.

EDUCATION

MCA, Jain Deemed College
Bachelor of Computer Application, University of Mysore

Expected 2025
Aug 2016 - Nov 2019

SKILLS

Technical Skills Frontend: HTML, CSS, JavaScript, React.js
DevOps: Jenkins, AWS, Kubernetes, Docker, Ansible, Bash Scripting, Python, GitLab, Nexus

EXPERIENCE

DevOps Engineer
Clari5 Customerxps, Bangalore

Aug 2021 - Present

- Orchestrated the design and implementation of CI/CD pipelines, boosting deployment efficiency by 20%.
- Automated infrastructure provisioning using Ansible, slashing deployment time by 30%.
- Optimized Docker containerization strategies, resulting in a 15% reduction in resource consumption.
- Created monitoring solutions for infrastructure health and performance using Grafana.
- Integrated GitLab CI/CD pipelines with automated testing frameworks to streamline development workflows.
- Collaborated with cross-functional teams to troubleshoot and resolve production incidents, ensuring minimal downtime.
- Mentored junior team members on DevOps best practices and tools.

PROJECTS

Personal Portfolio Website

Developed a personal portfolio website using HTML, React.js, and CSS.

Music App

Developed a dynamic music application using React.js and API fetching for seamless integration of music tracks.

Calculator

Implemented a basic calculator application using React.js for fundamental arithmetic operations.

Weather Condition Dashboard

Utilized real-time API data to design a weather dashboard in React.js, providing users with up-to-date weather information.

Google Notes Integration

Integrated Google Notes API into a React.js application for streamlined note-taking and organization.
